

Olivia Archer

olivia-archer@accinternational.com – (224) 650-4413 – www.linkedin.com/in/oarcher

Summary

Cybersecurity engineering professional with experience in network security, cloud security tooling, and enterprise endpoint management. Skilled in security log analysis, incident response support, and maintaining stable infrastructure. Seeking full-time roles in network security engineering.

Technical Skills

Cybersecurity Tools

Wireshark, Wazuh, Nmap,
Darktrace, Datto

Programming Languages

Java, JavaScript, C, Python,
HTML, CSS, SQL, Bash

Networking Concepts

TCP/IP, VPNs, Firewalls

Virtualizations

VirtualBox, VMware
vSphere/vCenter

Operating Systems

Windows, Linux

Technical Projects

Gesture Master

Jan 2024 – May 2024

- Program and build a device that interprets hand motions for applications like ASL
- Utilize Adafruit BNO055 gyroscope and accelerometer sensor, Arduino Uno, & Adafruit IDC (C++)
- Retrieve sensor and vector data

Cyber Security

Independent Study

Aug 2022 – May 2023

- Pilot cybersecurity curriculum for future high school students
- Successfully complete cyber.org lessons and labs
- Utilize virtual machines to test website for vulnerabilities

Education

Iowa State University | Ames, IA

August 2023 - May 2027

Bachelor of Science in Cyber Security Engineering

- GPA: 3.73/4.0
- Scholarships: Adventure Award, Expedition Award, Olga Margaret Thompson Endowment Fund, Outstanding Collegiate ISU Cabinet Member

Limerick University | Limerick, Ireland

January 2025 - May 2025

Study Abroad Program

- Scholarships: Bluth Study Abroad Fund
- Coursework: Irish Folklore I, Computer Systems Organization, Digital Systems 3, Operating Systems 2

Professional Experience

Data Security Engineering Intern | *Principal Financial*

Des Moines, IA

May 2026 - August 2026

- Supported the Information Security & Risk (ISR) team by assisting with cloud security tooling, including hands-on work with Zscaler ZIA, Proofpoint, and Splunk to provide DLP support and maintain enterprise access control workflows
- Participated in team standups, documentation reviews, and cross-functional discussions to understand enterprise-scale security operations
- Developed a Snowflake table unification process leveraging Cortex AI agents to merge disparate security datasets, streamline schema alignment, and enhance enterprise-wide data accessibility
- Shadowed the NSI team to build foundational knowledge of enterprise network infrastructure, including segmentation, routing logic, and firewall policy interactions

Undergraduate Research Assistant | *ISEAGE*

Ames, IA

January 2024 - Present

- Collaborate with a team to uniquely develop and properly manage five annual Cyber Defense Challenges
- Design and deploy custom virtual machines hosting web applications, databases, and vulnerable services to simulate realistic cybersecurity scenarios
- Contribute to the efficient operations of competition days by providing real-time support to competitors and creating post-event reports

Seasonal IT Analyst | *City of Woodstock*

Woodstock, IL

May 2025 - May 2026

- Shadow security analysts to discover the most productive incident response and logging techniques
- Assist in the daily network maintenance, endpoint management, and technical troubleshooting to ensure productive operations for over 450 users
- Analyze real-time security logs and shadowed incident response processes using SIEM tools to enhance detection and mitigation strategies
- Author internal technical documentation covering network topology, endpoint deployment procedures, and routine troubleshooting workflows to support team knowledge transfer and onboarding

Work Experience

Concert Merchandise Staff | *M&J Vending*

Chicago, IL

June 2023 - Present

- Set up, manage, and break down merchandise booths for high-capacity events at Soldier Field, serving thousands of attendees
- Provide excellent customer service by resolving inquiries and maintaining an organized, calm environment in fast-paced, high-pressure conditions
- Carefully handle high-volume transactions and manage large sums of cash and inventory with speed, accuracy, and attention to security
